WP-4B-08: Recording allergies

Example General Hospital, Ward 4B. Version 3 (fictional). Owner: Ward 4B nurse in charge (fictional role).

FICTIONAL TRAINING DOCUMENT. Not clinical guidance. Example General Hospital is fictional.

Scope

All patients admitted to Ward 4B.

Before the first medicine

Record the allergy status in MedTrack before any medicine is given, except in an emergency. For each allergy, record the substance and the type of reaction, for example rash or anaphylaxis.

No known allergies

'No known allergies' must be recorded explicitly. An empty allergy field means the status has not been checked, and it must be treated that way.

Identification

Patients with a recorded allergy wear a red identification band in addition to their standard band.

New reactions

Record any new reaction in MedTrack the same shift and inform the prescriber and the ward pharmacist.
